Powder coatings for interior industrial applications

TIGER Drylac® Series 09

- Features: High quality polyester-epoxy blend.
- Applications: Standard interior applications.
- Characteristics: Good chemical resistance, high flexibility, and dimensional stability.
- Use: Suitable for housing as well as surfaces where increased chemical resistance is required.

TIGER Drylac® Series 89

- Features: Polyester-epoxy blend for interior use.
- Applications: Standard interior applications.
- Characteristics: Good chemical resistance, high resistance to UV rays, and good dimensional stability.
- Use: Ideal for laboratory equipment, machinery parts, pump housings, and other industrial applications.

TIGER Drylac® Series 38

- Features: Polyester-epoxy blend for exterior use.
- Applications: Industrial applications.
- Characteristics: Good chemical resistance, high dimensional stability, and good resistance to UV rays.
- Use: Suitable for residential window and door frames, industrial applications, and other exterior applications.

TIGER Drylac® Series 18

- Features: Polyester-epoxy blend for exterior use.
- Applications: Industrial applications.
- Characteristics: Good chemical resistance, high dimensional stability, and good resistance to UV rays.
- Use: Suitable for industrial applications where a high performance weather resistance is required.

TIGER Drylac® Essentials

- Features: A range of colors that provide a new dimension in effect powder coatings.
- Applications: Industrial applications.
- Characteristics: Features a range of colors that provide a new dimension in effect powder coatings.
- Use: Suitable for industrial applications where a high performance weather resistance is required.
